HEALTH PHYSICS SOCIETY VIRTUAL WORKSHOP: EARN YOUR CONTINUING EDUCATION CREDITS FROM HOME!

Dan Sowers, CHP Corner Editor

Stop biting your nails about earning continuing education credits (CEC) this year towards recertification! You can still rack up a bunch of CECs and polish your health physics knowledge through the Health Physics Society's upcoming Virtual Workshop. Their website at HPS.org contains all the details, program, and registration portal.

The earning of CECs through this Virtual Workshop is the same as in the past. No credit will be awarded for business meetings, committee meetings, or award ceremonies. Each of the technical workshops that you participate in will be granted hour for hour credit. The Professional Enrichment Program (PEP) courses will be offered the same number of credits (4 per PEP) as if they were held in person.

Lots of folks worked lots of extra hours to bring this Virtual Workshop to life. We thank all the members who made this possible!

CALL FOR FUTURE CHP IN THE SPOTLIGHT ARTICLES

Dan Sowers, CHP Corner Editor

The replies have been unanimous: the Academy members want more CHP in the Spotlight articles. To be a CHP in the Spotlight, Mike and I just need a referral from a peer, colleague, boss, or other connection to get the ball rolling. We'll take care of the article's writing and shining some well-deserved recognition on that CHP.

Maybe you know someone doing their part in mentoring upcoming health physicists; maybe a team member is putting in extra hours on a worthy committee; maybe you would just like to recognize the superb daily work your coworker performs. Send an email to Mike and me and we'll take it from there! Thanks in advance!
